Subject: Benton REA All-Electric Program Incentive Process

Dear Home Builder,

This letter is to help guide you through the process of the All-Electric program incentive and get you paid as soon as possible.

At times, there has been confusion with builders between the process to receive electric service through the Benton REA engineering and operations department and the process to receive the All-Electric incentive for installing a hybrid electric water heater through the member services department that runs the energy efficiency programs.

If you are building an All-Electric home, there are two processes you must complete to receive your All-Electric incentive.

Electric Service

- Submit an Electric Service Application to the Benton REA engineering and operations department
- Submit a Temp to Perm Power Request form to the engineering and operations department three weeks prior to needing service

All-Electric Incentive (\$500)

- Install a hybrid electric water heater in the home
- Submit an All-Electric Incentive Application to the Benton REA member services department
- Submit a purchase receipt of the hybrid electric water heater and two pictures of it installed (one picture showing its installation and the second picture of the water heater nameplate) to the member services department

There are additional steps to receive electric service from Benton REA, which will be communicated and handled by the Benton REA engineering and operations department. Contact Amanda Nida, engineering and operations clerk, for more information at operationsclerk@bentonrea.org or 509-786-7305.

The All-Electric Incentive Application, the purchase receipt and the two required pictures should be submitted to me, Ron Mitchell, at mitchell@bentonrea.org. I am also available at 509-781-6752 if you have any questions or need additional information.

It's important to note that Benton REA must receive the required application, receipt and pictures prior to the home receiving its Certificate of Occupancy to qualify for the \$500 incentive.

Sincerely,

Ron Mitchell
Electrical Advisor

Benton Rural Electric Association

All-Electric Incentive Application

New All-Electric homes connected to Benton REA are eligible for a \$500 incentive for the installation of a hybrid electric water heater.

Please return this application to Ron Mitchell at the same time you provide Benton REA's engineering and operation department the building permit information and the service application.

Benton REA (Attn: Ron) or email to rMitchell@BentonREA.org
