

This agreement is between Benton REA and the parties listed below (member and contractor) in respect to enhanced incentives for the installation of certain energy efficiency measures. These rebates are available to members who meet the income qualifications set by the Sustainable Living Center.

In all cases, to be eligible for these incentives:

- The member must own the home.
- The homes must be served by Benton REA and be electrically heated.
- Benton REA will inspect the home both pre- and post-installation.
- In no case will the rebate exceed the cost of the installation.
- For HVAC, the contractor will submit sizing documentation and declare as to replacement/displacement.

**AVAILABLE REBATES (select the one you are applying for)**

- Conventional Heat Pump Installation – Maximum Rebate: \$6,200**  
Installation will meet PTCS Heat Pump requirements and be installed by a company participating in the Benton REA heat pump program.
- Single Head Ductless Heat Pump – Maximum Rebate: \$3,800**  
Following BPA specifications, the existing heating of the home must be electric furnace or zonal electric; the ductless heat pump must be on the BPA qualified products list and be installed by a trained technician from a company listed on GoingDuctless.com. Benton REA highly recommends a backup heat source.
- Heat Pump Water Heaters – Maximum Rebate: \$2,000**  
Unit must be on the BPA qualified products list and installed by a trained technician according to the manufacturer's specifications.
- Duct Sealing – Maximum Rebate: \$500**  
Ducts must be sealed to PTCS specification and by a PTCS trained technician.
- Energy Star Storm Windows – Maximum Rebate: \$10 per square foot**  
Pre-condition will be windows without storm windows that are single-pane or double-pane metal framed windows. The new storm windows must be on the BPA qualified products list and installed to BPA specifications by a company on the Benton REA window vendor/contractor list.
- Other measures that, on a case by case basis, may be considered include: whole home air sealing and insulation of ducts, floors, walls or ceilings.**
