

BENTON RURAL ELECTRIC ASSOCIATION

402 7th Street • P.O. Box 1150 • Prosser, Washington • (509) 786-2913 • Fax (509) 786-0291

Dear Contractor,

I am glad that you are interested in our ductless heat pump rebate program.

For your customers to qualify for Benton REA's rebates, they must be members of Benton REA and you must be an approved contractor through the Northwest Energy Efficiency Alliance (NEEA). To be approved and listed on NEEA's Installer Finder, at least one representative per company must attend a NW Ductless Heat Pump Project Installer Orientation. This training is available on-demand.

Before work begins on any ductless heat pump, you and/or the member are required to complete the Benton REA Residential HVAC Rebate Pre-Application – and send it to me by email or mail it to a Benton REA offices. As this form directs, if the rebate is allocated to the contractor, it must appear as a line item credit on formal bids and invoices.

Included with this letter is Benton REA's Ductless Heat Pump and Ducted Mini-Split Installation Form which must be completed and signed by the installer and returned to Benton REA before we can deliver the rebate. Similarly, our Confirmation of Completion form is attached. The member must complete and return it to Benton REA when the job is done to receive the rebate.

Benton REA's ductless heat pump rebates are as follows:

- Benton REA will pay \$800 for a system replacing baseboard or wall heaters
- Benton REA will pay \$800 for a system replacing an electric furnace

We look forward to working with you.

Sincerely,

Eric Miller
Energy Services

Benton REA has the following incentives to help members achieve energy savings through HVAC improvements. **As a member-owner, you get to decide who receives these incentives.** Use the check boxes on the left to select the qualifying measures you plan to have installed. Use the check boxes on the right to let us know if you want to receive the incentive or if you want us to pay the rebate to your contractor directly. Rebates allocated to the contractor will show as line item credits against the project cost on estimates and invoices.

Terminology for Measures

- Smart Thermostats:** An evolved & simplified programmable thermostat that can automatically adjust the heating and cooling temperature settings in your home for optimal performance and energy savings. Check our website or call us for qualifying thermostat models.
- Duct Sealing:** The process of sealing up duct work to reduce the leaks and ensure more of the conditioned air makes it to the desired rooms. Duct sealing requires a pre and post test to confirm savings (which are frequently substantial). More than 50% of the ducts must be outside of the home, such as in the crawlspace or attic.
- Commission & Controls (PTCS):** (C&C): Preparation, testing and reporting by the contractor to ensure a quality installation. Meant to assure the system will perform to achieve expected energy savings and system longevity.
- High Efficiency Heat Pump:** A high efficiency air source heat pump must have a Heating Seasonal Performance Factor (HSPF) of 9 or greater to qualify for the incentives.
- Variable Speed Heat Pumps:** Air source heat pumps that have a compressor that adjusts its capacity to the heating/cooling demands of the home at that moment. Presumed benefits of this technology are higher efficiency, better comfort and increased longevity.
- Conversion:** Replacing an electric furnace with a high efficiency or variable speed air source heat pump.
- Upgrade:** Replacing an older heat pump with a high efficiency or variable speed air source heat pump. This also includes upgrades from zonal and other types of heating systems.
- HSPF:** Heating Seasonal Performance Factor (HSPF) is the number associated with heating efficiency (higher is better).
- SEER:** Seasonal Energy Efficiency Ratio (SEER) is a number associated with cooling efficiency (higher is better).

Ductless Heat Pump (DHP) and Ducted Mini-Split Installation Form

All sections must be filled out by the installer at the time of installation. A copy of this completed form and the purchase receipt or invoice must be promptly submitted to Benton REA in accordance with utility policy.

Eligibility Guide for DHPs and Ducted Mini-Splits: Ducted Mini-Splits do not include homes with whole house centrally ducted systems. See PTCS Air Source Heat Pumps for further information on whole home centrally ducted systems.

All systems must:

1. Be installed on a dedicated electrical circuit,
2. Have refrigerant line protection on the entire length of exterior and insulated refrigerant lines,
3. Be installed in accordance with manufacturer specifications, including adherence to proper refrigerant charging and,
4. If installing a single head DHP, the contractor must have received the contractor orientation available at <https://goingductless.com/partners>.

Select what you are Installing (Select One)	Eligible Home Types (Select One)	Eligible Existing Heating System Being Replaced (Select One)
<input type="checkbox"/> Single Indoor Head DHP <input type="checkbox"/> Single Ducted Mini-Split (not whole home centrally ducted)	<input type="checkbox"/> Existing Single Family <input type="checkbox"/> Existing Manufactured <input type="checkbox"/> New Single Family (in all states except WA) <input type="checkbox"/> New Manufactured	<input type="checkbox"/> Electric Forced Air Furnace <input type="checkbox"/> Electric Zonal ¹
<input type="checkbox"/> Multi Indoor Head DHPs <input type="checkbox"/> Multiple Indoor Ducted Mini-Splits (not whole home centrally ducted) <input type="checkbox"/> Combination DHP/Ducted Mini-Split	<input type="checkbox"/> Existing Single Family <p><i>Note: Multi-head DHPs, multi ducted mini-splits and combination installs in New & Existing Manufactured Homes or New Single Family Homes (in all states except WA) may be eligible for single indoor head DHP or single ducted mini-split incentive (see above).</i></p>	<input type="checkbox"/> Electric Forced Air Furnace <input type="checkbox"/> Electric Zonal
